Introduction

The City of Stonnington's Community Grants program supports eligible community groups and not-for-profit organisations delivering Stonnington-based programs that:

- improve community health, wellbeing, and safety
- enhance social connections
- promote accessibility and inclusiveness
- advance social cohesion and reconciliation
- actively promote environmental sustainability.

The project must meet the objectives and priorities in the Council Plan 2021-2025 and key Council strategies.

Program objectives

The objectives of the Community Grants program are to:

- foster community participation, build social connections, and reduce isolation
- respond to local issues and priority areas of need within the community
- provide accessible and inclusive opportunities for communities who are considered vulnerable or under-represented
- build the capacity of local groups and organisations to develop, implement and sustain positive impacts in their community
- encourage sustainability and strong governance in the delivery of services and programs.

Principles and funding priorities

The Program is underpinned by the following principles, which inform funding priorities.

- **Access and equity** – We will support programs and organisations that address social inequity, promote social inclusion, embrace diversity, and establish environments that support all people regardless of age, ability, culture, or identity.
- **Social and economic participation** – We will support programs and organisations which support the local community and economy, encourage community involvement, facilitate volunteerism, and empower the community.
- **Positive working relationships** – We will support programs and organisations which operate with transparency, link with Council priorities, and maintain relationships based on mutual trust and respect.
- **Flexibility and responsiveness** – We will support programs which recognise and can adapt to changing needs and circumstance.
- **Sustained benefit** – We will support programs with approaches that can remain financially viable and achieve sustained participation and positive impact into the future.
- **Environmental sustainability** – We will support activities with low to zero environmental impacts and promote environmentally sustainable practices including plastic waste avoidance and reduction.

In addition, Council may determine specific priorities for a funding year in response to an identified community need or strategic issue. Any specific priorities will be announced by Council as part of releasing the Community Grants program.

The application process:

- you will receive an email confirming receipt of your application.
- your application will be assessed against the eligibility and assessment criteria by a panel of assessors. Except for taxation eligibility, Council retains discretion to waive or amend assessment and/or eligibility criteria.
- applicants that do not meet taxation eligibility will be withdrawn from the assessment process.
- funding recommendations will be submitted for a decision by Council.
- all applicants will receive a notification via email and in writing with the result of their application and will be provided with an opportunity for feedback.
- all funding decisions are final. There is no appeal or review process.

It is strongly suggested not to leave your application to the last minute to submit. System errors or delays may occur at times of heavy use with others submitting applications, which could result in your inability to lodge your application before the deadline.

Tips for writing a successful application:

- Consider the objectives and underlying principles of the Community Grants program (refer 'Program objectives' and 'Principles and funding priorities' in this document) when writing your application.
- Use evidence to help explain the need for your project and what it will achieve. For example, research findings, data, or statistics; media articles; project evaluations, etc. A greater level of evidence will be expected of applications seeking significant funding amounts.
- Review and clearly address each of the assessment criteria in your application.
- A succinct and clear application is often more effective than a long, overly detailed application, which can make the key information difficult to identify.
- Attach all the 'Essential attachments' above.
- Speak with a Council officer if you require further assistance (refer to 'Where to get help' below).
